**GLOBAL FINANCIAL CRISIS:  
FUNDAMENTAL CAUSES AND WAYS OF OVERCOMING**

Relationship is allocated between the financial crisis, monetary and fiscal policy, financial risk management, functioning of banking sector and monetary values. As the main cause of current financial crisis justified the existing imbalances (which will grow over time) between money as measure of value and a modern economic system. It is proved that the main cause of modern financial crisis is an existing disproportion (which will grow in time) between money as a measure of value and modern economic system. The fundamental direction of overcoming financial crisis — the creation of a new theory of money through the revision of economic variables, having connection with the amount of money is formulated. The determinants of influence on monetary values tare defined in the current chaotic structured economy.

*Key words: financial crisis, theory of money, monetarism, financial market, euro problem, financial market, volatility.*
