### **RUSSIAN PHILOSOPHY OF ECONOMICS: HOW TO REACH UNDERSTANDING WITH THE “NEW PHILOSOPHY OF ECONOMICS”? (part I)**

Philosophy of economics in Russian tradition is “philosophical problems of economics”; it is scientific interdisciplinary direction which researches the most fundamental, basis, metaphysical questions of development, evolution of both economy itself and economic science. “New philosophy of economics” (New PoE) in contemporary economic thought is designated as complex of problems (and such direction of research) which coming out of limits of traditional philosophy of economics. From the standpoint of Russian tradition “new philosophy of economics” is only comprehension of problems of “economic” exclusively in limits of elaboration of definite group of new economic methods. In order to go towards really new “philosophy of economics” it is necessary to separate ontological and theoretical levels of analysis, to fill empirical material by new conceptual and categorical content, and, at last, to “move up” to philosophical discourse. It is necessary in “new explanatory strategies” in philosophy of economics, also we need to re-conceptualize our approaches to understanding of nature and essence (ontology, epistemology and methodology) philosophical-economic knowledge, and for realization of this task it is necessary to apply Russian tradition of “philosophy of economics”.

*Key words: philosophy, economics, philosophy of economics, economic methodology, “new philosophy of economics”*

### **SOME PHILOSOPHICAL PROBLEMS OF LAW ENFORCEMENT IN THE POST-TOTALITARY SOCIETY**

The transition from a totalitarian society to an exclusively democratic society cannot be carried out in a short period of time. It takes time here. For the implementation of such a task, the results of a comparative study of the authors may turn out to be interesting. The paper analyzes some aspects of family law in modern Russia from the point of view of the philosophy of law. Interesting results are obtained when comparing the Russian legal situation with similar segments of the law of some foreign states, for example, Mexico, the Republic of Lithuania.

*Key words: philosophy; right; totalitarianism; Mexico; Lithuanian; Republic; Russia; marriage; family; right; democracy; legal; state.*

## **ECONOMIC DIPLOMACY AS A FORM MODERN COMMUNICATION PRACTICES**

Problems Judgment and definition economic diplomacy as communication phenomenon are considered. It is defined as the specific form of two, or multilateral communicative interaction directed on increase of stability and competitiveness economic the subject by optimization of exchange processes with external agents that is capable to provide achievement of the purposes of his economic development, realization maintenance of a due level of safety of his positioning. These communicative practice are considered at subject - subjective and subject - objective levels. In the first case these interactions have parity character and pursue the purpose - the coordination interests of subjects. In the second case the subject of interaction adheres to a principle of "mini-max", pressing through the interests, with use of various tools of information pressure. As a result of such subject-objective diplomacy compulsion of the opponent to acceptance of the certain decision fraught with loss by his economic structures of an achieved level of economic safety is carried out. The basis for realization of both these strategy is in the special image the designed information which serves as the base tool of achievement of the purposes, both in subject-subjective, and in subject-objective communicative processes. Given information should have the expressed system attributes and to be the carrier, as a minimum, the following functional blocks: actualizations; projective; elimination. It is supposed, that use such functional an information product during the directed communications will cause an opportunity of achievement of the specified purposes of economic diplomacy – «coordination», or «compulsion». The nature and the target bases of this process is opened also. Functions and toolkit of this activity are defined.

### **THE PROBLEM OF HUMAN CLONING: LEGAL AND MORAL AND ETHICAL ASPECTS**

Currently, the legislation establishes that responsibility should be incurred for cloning a person, as well as importing cloned human embryos into and out of the Russian Federation, but there are no norms containing such responsibility in the law. The negative attitude of world religions to human cloning is explained by the undermining of the dogmas about the creation of man by the Creator. On the other hand, cloning technology offers tremendous opportunities for the cure of many serious diseases. The authors propose to regulate both criminal and administrative liability for human cloning, as well as to fix the nullity of civil transactions that may arise in the field of cloning.

*Key words: cloning, embryo, law, responsibility, morality, religion.*
