ECONOMIC THEORY

Zubakov V.M., Laguta I.V.

THE PLACE OF THE «HARVARD PARADIGM» IN THE INVESTMENT ATTRACTIVENESS SYSTEM OF THE RUSSIAN ECONOMY. PROBLEM STATEMENT

The main idea of the article is related to a long-standing dispute between E. Chamberlin and J. Robinson in terms of their interpretation of the balance fundamentals in social production relations. While the British economist, Robinson, believed that the basic criterion of sustainability and long-term economic balance was that market agents were as close as possible to the ultimate limits of perfect/imperfect competitive exchange of goods and services (perfect/imperfect competition), the American one, Chamberlin, strongly disagreed with this unrealistic resolution of the main issue of general market distribution. He considered only monopolistic competition at the micro-level as the main guarantor of long-term balance in market distribution at the macro-level. The authors follow E. Chamberlin's scientific verdict and confirm the validity of this opinion with F. Edgeworth's equilibrium model.

This part contains the statement of the above-mentioned problem.

Keywords: total product, ultimate concern, production factors, overall balance, perfect/imperfect competition, labor efficiency, economic growth, "Harvard Paradigm", institutes and innovations, efficiency and effectiveness, financial rationality, investment attractiveness.

INTERACTION OF CONSTITUTIONAL STATE, CIVIL SOCIETY AND PERSON TOWARDS ATTAINING EQUITABLE SYSTEM IN RUSSIA

The article focuses on a couple of such interrelated concepts as "society" and "state", where society continues to play a leading role. It generates the state from the very beginning, giving it content and thereby giving it a place just in one of the political forms of society's existence. The second political part of society is civil society, with its institutions, through which citizens influence both the state and the civil society as well as the directions of their development.

Keywords: society, state, interdependence, law, citizen.

MORPHOGENESIS OF THE POWER SEPARATION SYSTEM IN LPR

For the effective stabilization of the political life of the regional society, the establishment of stable constitutional order, it is very important to have a correct understanding of the tasks and mechanisms for dividing the branches of state power. Today the LPR is in an interstitial situation, and a certain imbalance between the executive, legislative and judicial branches of government as well the unclear distribution of powers between them create aporia at the stage of democratic consolidation. The article analyzes the place and role of the mechanism of "checks and balances" in the political system. The features of the functioning of the branches of power in states with various forms of government are revealed. The problems and prospects for improving the interaction of the executive, legislative and judicial branches of government in the LPR are identified.

Keywords: the mechanism of "checks and balances", legal regulation, executive power, legislative power, judicial power.
