DEVELOPMENT OF THE ECOSYSTEM APPROACH IN THE CONTEXT OF INCREASING THE INNOVATION ACTIVITY OF RUSSIAN ENTERPRISES

Annotation. The article substantiates the role of the innovation ecosystem as a factor in increasing the innovation activity of Russian enterprises. Based on the works of foreign and domestic authors, the existing approaches to the definition and content of the concept of "innovation ecosystem" are considered. The authors confirm the high importance of the innovation ecosystem in activating the processes of development and implementation of innovations. As one of the main conditions for the "effectiveness" of the innovation ecosystem, the mutually beneficial nature of the cooperation of its participants and the environment created for this is defined. The interaction of the state, education, and business have been established as a "classical" model of participants in the innovation ecosystem, reflected in various variations of the list of "actors" of the system, from developers

of innovative ideas to their consumers. Starting from the existing trend in the development of the theory and practice of innovative ecosystems, the need for the development of an ecosystem approach through the allocation of a "managing" link is established, which is reflected in the works of modern researchers. A management company has been proposed as one of the options for such an element of the innovation ecosystem. It is proved that increasing the efficiency of management in innovative ecosystems will contribute to the activation of innovative activities of domestic enterprises and the development of the country as a whole.

Keywords: *innovative development, country, business environment, innovative ecosystem, management company, ecosystem approach, management*

INFLUENCES OF DIGITAL TECHNOLOGIES ON THE WORLD ART MARKET

Annotation. At the present stage of social development, the art market is expanding rapidly. It attracts the interest of potential participants with high income and other preferences and contributes to the overall reality of the world economy. The relationship between the art objects' cultural and market value is difficult to understand by the majority, has always been a relevant and worthy subject for professional researchers. Focus on this topic has been reinforced by the particularities of globalization and the dynamic institutional changes in the world economy brought about by digitization, the pace of which has speeded up COVID-19 crisis without appeal.

The purpose of this study is to identify the main ways of regulation of international art trade as part of the process of the digitization of the world economy.

Keywords: *art object, art market, digitalization*

SPECIAL TAX REGIME FOR SELF-EMPLOYED: PRACTICES AND PROSPECTS OF DEVELOPMENT

Annotation. Attempts to legitimize spontaneous entrepreneurial activity and legalize shadow business in Russia have been going on for many years. The purpose of introducing a special tax regime for self-employed citizens is to reduce the shadow sector of the economy and legalize the income of the self-employed population: on average, about 100 thousand people are registered each quarter. new self-employed citizens. The research carried out by the authors made it possible to evaluate the existing practice of using this tax regime, to identify the following problems faced by self-employed citizens, as well as to assess the prospects for its improvement.

Keywords: self-employment, special tax regime for self-employed

HISTORICAL MEMORY AS A FACTOR IN THE FORMATION OF THE DONBAS IDENTITY

Annotation. The article analyzes the phenomenon of historical memory as a cosignatory of identity development. The authors consider the theoretical basis and important functions of historical memory for strengthening the people's self-awareness and shaping the state policy of memory. The significance and role of historical memory in the system of social values have been investigated as well as its influence on the critical perception of the past and the production of vernacular symbols. Historical memory and consciousness develop an original culture which, on the one hand, is a powerful means of self-identification and, on the other hand, promotes tolerance and understanding among the different social strata of the LDPR.

Keywords: *historical memory, identity, historical consciousness, social values, culture*
